Goals Creative and critical thinking is a skill that makes a person active, tolerant, empathetic and enables them to make thoughtful and well-founded decisions. It is about the ability to think that encourages quality problem solving because a person critically examines the situation and thinks about the problem in such a way that he moves away from the prejudices that he potentially has. Through various workshops in class, it encourages students to think independently, create their own attitude, be independent in decision-making, reasoned debate, which shows that		

they can fight for themselves in an intellectual way, while respecting the opinion and autonomy of others.
